

2023 PREDATOR OLD VINE ZINFANDEL is crafted using a holistic approach that includes the use of natural predation. In order to control aphids, mites, and other pests, we rely on the voracious appetites of ladybugs. They devour these harmful critters without the use of chemical inputs and look beautiful as they do it.

LODI, CALIFORNIA is ideally situated between the Sierra Foothills and the San Francisco Bay Delta. Vineyards here benefit from powerful sunshine followed by cool afternoon and evening breezes known for extracting complex flavors from the fruit. The 2023 vintage was cooler and longer than usual and growers had to be judicious when timing the harvest. The good news is that the wines show excellent balance of natural acidity and a surprising depth of phenolic content.

FOOD PAIRING: Elevate your everyday meals of one-pot pasta and homemade pizza with this zin and share it at gatherings featuring rack of lamb or osso bucco.

WINE STYLE: This full-bodied wine delights with dark fruits, cherry, and spice. Softer tannins linger over a long, smoky finish.
